

Model 423

Legacy Series
closed door baler

MAREN
Balers & Shredders
Building customer loyalty since 1962.

Extra Large
Hopper Opening
Makes it Versatile

Small Size
Saves Valuable
Floor Space

Operates while
Unattended with
Full Bale Buzzer

Features Automatic
Bale Ejection for
Operator Safety

Floor Space ... use less – make more!

The **Model 423** has an extra large feeder hopper that can be adapted to **gravity, pneumatic** or **belt conveyor** automatic feed devices. Fully automatic baling cycle with start-compress-and-stop action, requiring only a part-time operator to tie-off bale and open ejector door. Bale automatically gets ejected as new bale is being formed. **Saves space and money.**

Processing Plants
Tissue Waste
Plastic Film
Die Cuttings
PRINTERS

The ONE SOURCE for innovation for your Waste Management System.

With all the operating features of larger more expensive balers, the Model 423 is the most efficient automatic baler of its kind!

FEATURES:

- : Ez one step bale tie-off reduces labor, eliminates wire hanging in aisle
- : Optional wire guide allows an operator to feed wires and tie-off all on one side
- : Fits in places where large balers can't
- : Can be feed by airstream, conveyor or hand

MAREN 423

Legacy Series
closed door baler
